

**SIMPLE.
SAFE.
SANITARY.**

Safety and sanitation in public areas, on and around solid waste containers, and in high-pedestrian urban areas has never been more important. As the leader in innovative sanitation and disinfection products, Binova's EnviroSPRAY™ Safety Sanitation Systems provide the very best disinfecting and cleanliness standards in the industry.

EnviroSPRAY™ systems spray disinfectant through a boom from the side of an outfitted truck or UTV. This allows the “touchless” application of disinfectant of roadside trash bins (residential or commercial), sidewalks, parks & recreation sites including picnic tables, playground equipment, park benches and many other applications. For metro areas, the EnviroSPRAY™ systems allow safe, fast, and highly effective sanitation of public spaces, restrooms, bus stops, outdoor benches, playgrounds, sidewalks, homeless areas, and much more.

Multiple Unit & Feature Options Available.

UTV- MOUNTED SAFETY SANITATION SYSTEM. B60U-SA-E

The B60-U skid sprayer has a 60-gallon capacity and fits well in utility terrain vehicles. Binova's B60 sprayer features top mounted tank fittings for enhanced durability, along with a hose reel and remote controls for ease of use.

Standard configuration includes the 60-gallon tank/frame assembly, 12-volt electric motor, a manual hose reel with 50' hose and a 16' whip for UTV wiring harness.
